

DELIVERING BUSINESS ADVANTAGE

Solution Architect

OSS Group is one of New Zealand's leading I.T. consulting and solutions companies.

Our mission is to deliver competitive advantage to our clients through the considered and effective application of information technology, and the reliable operation of outsourced systems and processes.

Our expanding client base includes many of New Zealand's best-known companies and organizations.

Our Auckland-based software team work with a range of technologies to deliver bespoke applications, middleware and integration solutions, and software development services.

Job Description

We are seeking an experienced solution architect to work in our Architecture and Integration practice.

In this varied role, you will enjoy a mix of:

- Solution conceptualisation with clients
- Architectural specification
- Detailed API and application specification
- Data modelling
- Providing technical leadership across the full solution delivery lifecycle
- Sales support and project estimation

You will often work on site with our large clients as a subject matter expert, working with client stakeholders, analysts, project managers, and other systems specialists, to deliver to project objectives and operational support levels.

You will have access to guidance and support from colleagues within OSS Group and our software partners.

Skills

The successful candidate will have skills in:

- Business analysis and solution specification
- Multi-tier and web application development
- Testing and troubleshooting
- Definition of processes and best practices
- Documentation
- Project planning, estimation and tracking.

The successful candidate will have demonstrable enterprise expertise across:

- Architecture modelling techniques and tools
- Java-based technologies and frameworks
- RESTful services
- Integration frameworks (e.g. Talend, Mule, Apache Camel)
- Identity, authentication and authorisation technologies (e.g. OAuth2, Oracle Access Manager)
- Database query languages (e.g. SQL, CQL)
- Source control tools, Testing tools, Deployment tools
- Testing and diagnosis of web-based application and connectivity issues
- Proficiency in operation and configuration of Linux, Application Servers, SQL databases, etc

Expertise in the following would be advantageous:

- Master Data Management
- BPMN, BPEL
- CRM applications
- IP networking, security
- Virtual and physical infrastructure
- Systems monitoring, management and orchestration tools.

The successful candidate will have:

- Ability to make and maintain relationships with, and consult with business stakeholders up to enterprise C-level, and with technical stakeholders
- Strong commitment to delivering positive outcomes and client success
- Strong oral and written English communication skills, including the ability to produce high-quality documentation
- Organised and methodical working style
- Understanding of the big picture, and attention to detail where required
- Ability to work independently, and collaboratively as part of a team
- Experience in delivering enterprise solutions in alignment with various methodologies, and able to articulate their principles, benefits and overheads
- Willingness to travel occasionally
- Willingness to undertake some outside hours and/or on-call work
- NZ citizenship or an appropriate NZ work permit.

Relevant certifications are of interest, but are not essential to the role.

Existing relationships with senior client stakeholders and the ability to gain business from them would be advantageous.

What we provide:

- A competitive base salary, commensurate with experience and ability
- Generous overtime and on-call provisions, where applicable
- Computing, connectivity and other expenses
- Participation in the company's bonus scheme
- Training and career progression options within the group.
